Index used to classify folk narratives. The Aarne-Thompson-Uther Index ( ATU Index) is a catalogue of folktale types used in folklore studies. The ATU Index is the product of a series of revisions and expansions by an international group of scholars: Originally composed in German by Finnish folklorist Antti Aarne (1910); the index was translated into English, revised, and expanded by American folklorist Stith Thompson (1928, 1961); and later further revised and expanded by German ...

Stith Thompson (March 7, 1885 – January 10, 1976) was an American scholar of folklore. He is the "Thompson" of the Aarne-Thompson classification system, which indexes certain folktales by their structure and assigns them AT numbers. He also developed an alpha-decimal motif-index system (A~Z followed by numeral) for cataloging individual motifs.
