In abstract algebra, a semiring is an algebraic structure similar to a ring, but without the requirement that each element must have an additive inverse. The term rig is also used occasionally—this originated as a joke, suggesting that rigs are rings without negative elements, similar to using mg to mean a ring without a multiplicative identity. Tropical semirings are an active area of research, linking algebraic varieties with piecewise linear structures. Algebraic structures Group-like ...

Fractional Rig Sloop The forestay on a fractional rig sloop doesn't reach the top of the mast; it connects at a lower point. There are performance advantages to this setup, since a fractional rig allows the crew to bend the top of the mast and flatten the sails on a windy day when full power is not needed. Popular in the 60s and 70s, fractional ...
