Motor Control: Translating Research into Clinical Practice ...

Patla and Shumway-Cook 1 have suggested that the physical requirements associated with community mobility are complex and should not be limited to the variables of distance, speed, and terrain. They presented a conceptual model in which attributes of the physical environment are grouped into 8 categories, referred to as "dimensions."

Unit 3 (Motor Learning, Control, and Performance ...

Motor learning allows us to develop new skills, such as mastering a tennis serve, and also ensures the accuracy of simpler reflex behaviors. One such example is the vestibulo-ocular reflex (VOR), which functions to stabilize images on the retina. The VOR displays impressive adaptation to changes in environmental requirements, such as those ...
